## Akers Academy

### ***After School Program***

Our “After School” children have had a full day of academics at school. Our program is structured to give them some relaxation time, in an organized, fun environment.

The first activity our school age children will have is outside play to get the gross motor skills developing and de-stressing from the day.

After outside play a snack will be served to renew their energy. Children will then have their choice of activities.

Homework tables will be set with Teacher guidance for those who wish to finish their homework and have their evenings free.

Game stations, building areas, hopscotch and bean bag games, Writing and art stations, Library and books will all be available.

After station time there will be a special event times

Monday—Science Experiments

Tuesday---Crafts

Wednesday---Tape record stories for other classes, Journal writing,  
Book illustration

Thursday—Competition Games (checker tournaments, kick ball, math skills)

Friday ---- Cooking

*Special event times will change with the interest of the groups .Children will have input into the events chosen per month.*

Wrap-up activities at the end of the day will be music, dance, yoga and exercise.

A quiet time at tables with puzzles, books, paper games, and conversation will end their day.

**The goal of the after school program is to keep your school age child safe, happy, stimulated and involved.**
