Akers Academy

Infants

Your baby will always feel loved, safe and stimulated at Akers Academy!

For your special little one, Akers Academy teachers provide a loving, nurturing and stimulating atmosphere that encourages exploring, bonding with others, peace of mind, stimulation and curiosity. Yoga, sign language, and Spanish is introduced daily to our babies to further their growth.

Exploring

Our infant program is an interactive program based on research of the infant brain development. It includes:

- Classical music and sensory games, finger plays and songs that stimulate thinking and movement.
- Yoga to stretch, strengthen and enhance movement while relaxing your baby.
- Bright, colorful playthings that encourage exploration and new challenges
- Story times and puppets to stimulate language and socialization.
- Fun activities for both large and small motor skills
- Theme –based activities that encourage early imagination and interaction.
- Sign language – to encourage communication and language skills.

Your baby will build early language skills through playful songs, rhymes, conversation, imitation and stories. Recognizing voices, associating actions with sounds and movement, making their own special sounds will all be a part of their language growth.

Bonding

Our low ratio between teacher and infant ensures that your baby will have the most personalized care, attention and opportunities for development. “Tummy Time” with other babies, “Mirror- mirror on the Wall” will give each little one an opportunity to play with others, react to the human face and find friendships at the earliest ages.

Our teachers provide you with a daily communication sheet about your baby’s day. You won’t miss a thing as we transition your baby from school to your loving arms. Our daily reports include:

- Eating, sleeping and diapering schedule
- Your baby’s activities for the day
- Your infants response
- Special comments from the teachers or needs

Peace of Mind: We adhere to the strict standards for safety and sanitation throughout the classroom and outdoor areas. Your baby’s happiness, safety, security and developmental growth are the primary goals. We love our babies! We want this first year to be one of wonder, love, growth, exploration and development, discovering a love of learning and a new beginning.
